

Wyoming Energy Authority State Energy Programs

There is still grant money available for small businesses interested in improving their energy efficiency.

The Small Business Energy Audit and Retrofit grant still has a couple of spots open, and the Agriculture and Rural Small Business Energy Audit grant is still accepting applications and issuing awards. The Agriculture and Rural Small Business Energy Audit grant is first-come-first-serve, and the energy audit can be used to apply for the [USDA Energy Efficiency Improvement Guaranteed Loans & Grants](#).

Programs Impact in 2020

Grant Results – What are the cost and energy savings in PY2020?

\$659,725.90 Grant Amount Awarded	\$97,128.73 Estimated Annual Cost Savings	6/8 Average Payback in Years
995,910 Estimated Annual Energy Savings (kWh)	4,721 Estimated Annual Energy Savings (therms)	1,692,199 Estimated Annual Emissions Avoided (pounds of CO ₂)

**data is pulled from energy audit reports and calculated based on EIA information. Actuals will be known one-year post-project completion.*

To apply for either of these grants, please visit wyoenergy.org/financing
